

DESIGNER

MONTALBA ARCHITECTS, INC., is a diverse, design-driven and high-service architectural practice based in Santa Monica, California with a satellite office in Lausanne, Switzerland. We pride ourselves on the high-energy of our projects, the strength of our team, and the quality of our work. Our body of work primarily consists of private residences and boutique retail stores, as well as hospitality and commercial projects. Projects vary widely in budget and scale.

Our LA office is centered within Bergamot Station Art campus in Santa Monica; amongst art galleries and the newly opened Metro Expo line stop. We have an intense, fast-paced, and collaborative atmosphere and we believe that dedicated individuals who invest time and energy into their work will find valuable opportunities for growth. As such, we want people that have high expectations of themselves and others. We are looking for people that have an ambition to be challenged, enjoy working with great people and want to develop as part of a team while doing great work.

This full-time, salaried position is available immediately. We provide a competitive salary and a generous benefits package. We support growth within the office, encourage professional development and strive to make our staff feel encouraged and valued. A successful candidate should have a strong interest in retail and residential work and a desire to grow quickly in knowledge and responsibility. With projects across the United States and throughout Europe, potential candidates must be able to travel and be actively engaged with projects outside of our Southern California office.
