

PROJECT ARCHITECT with JAPANESE proficiency

Satoh Brothers International provides commercial design and construction services throughout the West Coast and Texas. With its roots in catering to the US operations of Japanese corporations, Satoh Brothers prides itself on timely project completion and emphasis on quality. Our work spans a wide range of project types including retail/tenant improvement, corporate offices, K-12 education, restaurants, ground-up buildings, logistics, cold storage, and manufacturing facilities.

We are seeking a qualified Project Architect who can manage a variety of assignments in term of type and scope with daily responsibilities that can vary greatly. These include:

- Outstanding problems solving abilities
- Ensuring quality in project delivery
- Maintaining a positive outlook within team concept
- Applying the company's process and procedures
- Representing client's vision on every project

Responsibilities

- Interface with client with emphasis on relations with Japanese clientele.
- Competently manage architectural personnel.
- Develop project schedules with milestones and review with client, contractor and staff.
- Review all project related documents for completeness and accuracy.

Qualifications

- Strong written and verbal communication skills in **JAPANESE** and English.
- 10+ years of architectural design and construction documentation production experience.
- 10+ years of project management experience including contract administration.
- Architectural licensure (state of California preferred).
- Proficiency in AutoCAD 2009 or Revit 2009 or above preferred.
